CEO's Message

CEO & Founder's Message – Ata Ur Rahman

Welcome to **Sawael Dhahabi Petroleum Products Company**, a name that represents quality, innovation, and reliability in the petroleum and lubricants industry.

From the very beginning, our mission has been clear – to build a company that delivers performance, trust, and long-term value. What started as a vision has grown into a respected organization serving clients across Saudi Arabia and the GCC, supported by strong partnerships, advanced operations, and a dedicated team.

At **Sawael Dhahabi**, we believe that progress comes from continuous improvement, ethical business practices, and a deep commitment to customer satisfaction. Our focus on technological advancement, product quality, and service excellence ensures that we remain at the forefront of our industry. We take pride in contributing to the Kingdom's Vision 2030 by offering sustainable, high-efficiency lubricant solutions that empower industries and protect the environment.

As we continue to grow, our commitment remains unchanged – to serve our customers with integrity, exceed expectations, and shape a future built on performance and trust.

Warm Regards,

Ata Ur Rahman

Founder & CEO

Managing Director's Message

شركة سواحل ذهبي للمنتجات البترولية

SAWAEL DHAHABI PETROLEUM
PRODUCTS COMPANY

Managing Director's Message

Faizaan Ur Rahman

*At **Sawael Dhahabi Petroleum Products Company**, we believe that true success lies not only in achieving business growth but in creating meaningful partnerships and lasting value.*

Our company stands on a foundation of integrity, innovation, and quality. Every product we deliver and every relationship we build reflects our promise of reliability and excellence. From automotive lubricants to industrial solutions, we aim to serve our clients with precision, consistency, and care.

Through dedication, teamwork, and strategic expansion, we continue to strengthen our presence across Saudi Arabia and the GCC region. Our team's commitment and our modern facilities allow us to meet evolving market demands while maintaining world-class standards.

As Managing Director, I am proud to lead a company that is driven by vision, powered by innovation, and sustained by trust. Together with our partners and customers, we will continue to move forward – fueling progress and inspiring performance.

About Us

شركة سواثل ذهبي للمنتجات البترولية

SAWAEL DHAHABI PETROLEUM
PRODUCTS COMPANY

About Us

Sawael Dhahabi Petroleum Products Company (Golden Liquids), formerly Abdullah Saleh Bin Mohammed Al Bilal Factory. Over 25 years of strong presence in the Saudi Arabian lubricants and petroleum sector.

Manufacturers of automotive & industrial lubricants, greases, coolants, brake fluids, and DM water.

Trusted in the Saudi market with expansion plans across Asia and Africa. Long-standing business relationship with Lubref (Aramco) for premium base oils.

ISO 9001, 14001, and 45001 certified quality-focused operations.

Brands portfolio: QMax (Economical), Gasomin (Industrial/Economy), Petrobull (Premium)

Mission & Vision

Mission

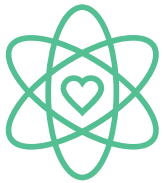

Our mission is to provide reliable, high-quality petroleum products that meet international standards and exceed customer expectations.

We are dedicated to continuous improvement through innovation, technological advancement, and customer-driven service, ensuring that every drop we deliver adds value to our clients' operations.

Vision

To become one of the most respected and innovative petroleum product companies in the Middle East – recognized for quality, integrity, and service excellence. We aim to contribute to the Kingdom's Vision 2030 by promoting sustainable, high-efficiency lubricant solutions that enhance industrial performance and environmental responsibility.

Core Values:

At the heart of Sawael Dahabi's operations are values that define who we are and guide every decision we make:

Integrity: We operate with honesty, fairness, and transparency in all our dealings.

Quality: We are committed to delivering premium products that ensure superior performance and protection.

Customer Focus: Our customers' satisfaction is the foundation of our success.

Innovation: We embrace technology and continuous improvement to stay ahead of market needs.

Sustainability: We strive to minimize environmental impact through responsible sourcing and production.

Teamwork: We believe in the power of collaboration to achieve excellence together.

Quality Commitment

Quality is the cornerstone of everything we do at Sawael Dahabi Petroleum Products Company.

We adhere to strict quality assurance protocols from sourcing raw materials to production, packaging, and delivery. Our facilities and processes are designed in compliance with international standards such as API, SAE, ISO, and ASTM, ensuring every product meets or exceeds performance requirements.

Our Capabilities

شركة سوائل ذهبي للمنتجات البترولية

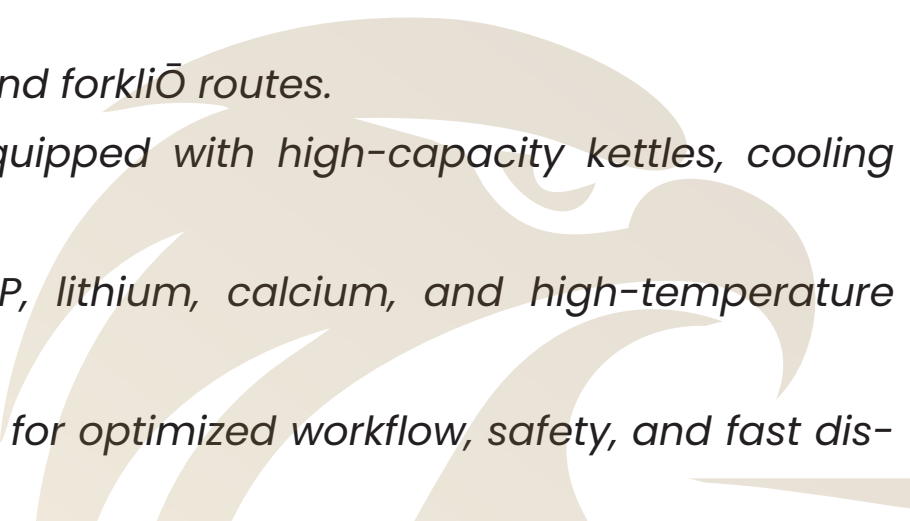

SAWAEL DHAHABI PETROLEUM
PRODUCTS COMPANY

Company Infrastructure:

Total Land Area: 10,000 sq. meters

- *A spacious industrial facility designed for high-volume production, efficient logistics flow, and safe movement of personnel and materials.*
- *Includes dedicated sections for manufacturing, storage, QC labs, Utilities, and administrative operations.*

Three Industrial Hangars: Production, Storage & Grease Plant

- *Our facility is divided into three purpose-built hangars:*
 - *Production Hangar: Houses lubricant blending, coolant production, brake fluid lines, and automated filling machinery.*
 - *Storage Hangar: Organized raw material and finished goods warehouse with racking systems, pallet spaces, and forklift routes.*
 - *Grease Plant Hangar: Equipped with high-capacity kettles, cooling systems, and grease finishing lines for MP, EP, lithium, calcium, and high-temperature greases.*
 - *Each hangar is designed for optimized workflow, safety, and fast dispatch.*
- 

Air Scrubbers Installed for Environmental Compliance

Advanced air filtration and scrubbing units operate across the plant to ensure:

- *Fume control during blending and healing*
- *Zero harmful emissions*
- *Compliance with Saudi environmental standards*
- *Safe and clean working environment for staff This showcases our commitment to*
- *sustainability and regulatory compliance*

Fire-Safety Equipped with Pumps, Hydrants, Extinguishers & Alarm Systems

Our plant follows strict NFPA and Civil Defense requirements with:

- *Dedicated fire pump room (diesel & electric pumps)*
- *Hydrant network across all hangars*
- *Fire extinguishers and sand buckets strategically placed*
- *Smoke and heat detectors*
- *Audible alarm systems Ensuring complete fire protection for property, personnel, and operations.*

ISO-Certified Operational Standards

Our facility operates under internationally recognized standards:

- *ISO 9001 – Quality Management System*
- *ISO 14001 – Environmental Management System.*
- *ISO 45001 – Occupational Health & Safety Management System These certifications ensure*
- *A high level of quality, safety, and consistency in our manufacturing processes*

Land & Layout

Dedicated Zones for Storage Tanks, Feed Tanks, Blenders & Finished Goods

The facility is systemically divided into specialized operational zones:

- *Bulk storage tanks for base oils and chemical additives*
- *Feed tanks connected directly to blending units for streamlined production*
- *High-capacity blenders (coolant, lubricants, brake fluid, grease) placed strategically for efficient workflow*
- *Finished goods warehouse with pallet racking, dispatch area, and forklift lanes This zoning ensures safety, cleanliness, and optimized production throughput.*

Separate Engine Oil, Coolant, Brake Fluid & Grease Production Lines

Each product category operates on an independent line to maintain quality integrity and avoid cross-contamination:

- *Engine oil blending & filling line with multi-grade capability*
 - *Coolant production & automated filling line for premix and concentrate variants*
 - *Brake fluid filling line with moisture-controlled environment*
 - *Grease plant with dedicated kettles, finishing mills, and packaging systems*
- 

Centralized QC Laboratory for Routine Quality Checks

A fully equipped laboratory located at the center of manufacturing activities for rapid response and testing.

Capabilities include:

- *Testing lubricants, coolants, brake fluids & greases as per ASTM & ISO methods*
- *Viscosity, flash point, pour point, TBN/TAN, corrosion tests & more*
- *Batch-wise approval to ensure consistent product performance*
- *R&D capabilities for formulation improvements and new product development*

Plant & Machinery

Base Oil Storage Capacity Exceeding 800 MT

A dedicated bulk storage area equipped with:

- *High-capacity mild steel and stainless-steel tanks*
- *Secure pipeline connections to blending and production zones*
- *Closed-loop transfer systems to avoid contamination*
- *Level monitoring, temperature control & safety venting mechanisms*
- *This ensures uninterrupted supply for large-volume production.*

Blender & Feed Tank Capacity Totaling 150 MT

State-of-the-art blending systems designed for precision and efficiency:

- *Multiple high-speed mixers and feed tanks*
- *Capability to handle various viscosities and formulations*
- *Heating, cooling, and agitation features*
- *Digital control systems for batch accuracy Ideal for producing engine oils, industrial*
- *lubricants, coolants, specialty fluids, and brake fluids*

Total Finished Product Capacity: 8,400+ MT Annually

Our facility supports high-output filling and packaging operations, enabling:

- *Large-scale production for domestic and export markets*
- *Multiple SKUs (1L to 208L drums, IBCs, gallons, pails, and tins)*

6, 8 & 12-Head Lube Oil, Coolant & Brake Fluid Filling Lines

Fully automated semi-automatic and automatic filling machinery includes:

- *Precision volumetric filling systems*
- *Stainless-steel conveyors and adjustable bottle guides*
- *Neck clamping, anti-drip nozzles & high-speed operation*
- *Dedicated lines for lubricants, coolants, and brake fluids Ensures consistent accuracy and hygiene across every batch.*

Automated Grease Kettles

Modern grease production plant featuring:

- *High-temperature kettles*
- *Controlled heating & cooling cycles*
- *Milling, finishing & homogenizing units*
- *Direct transfer to packaging machines Designed for MP, EP, lithium, calcium, and high-temperature greases.*

Boilers, Furnace Systems & Industrial Utilities

Reliable heating and utility infrastructure supporting 24/7 operations:

- *Diesel-fired boilers for blending & grease processing*
- *Furnace system used for dehydration and heat-sensitive processes*
- *Air compressors, pumps, filtration units & electrical panels*
- *Fire safety and emergency shutdown systems.*

Product **Range:**

Engine Oils (Petrol & Diesel)

A complete selection of automotive and industrial engine oils designed to deliver optimum performance across all vehicle segments.

- *Mineral, semi-synthetic & fully synthetic oils*
- *Enhanced detergency, wear protection & oxidation stability Suitable for passenger cars, commercial trucks, heavy machinery, generators, and off-road equipment.*

Hydraulic & Gear Oils

High-performance lubricants engineered for smooth operation of hydraulic systems and gear mechanisms.

- *Anti-wear (AW) protection*
- *Oxidation and corrosion resistance*
- *Rust, corrosion & foam resistance Application areas include hydraulic presses, forklifts, industrial machinery, gearboxes, and transmissions.*

Coolants (Premix & Concentrate)

Premium long-life radiator coolants formulated for effective heat transfer and superior engine protection.

Our coolant range includes:

- *Ready-to-use premix coolants*
- *Concentrates for dilution flexibility*
- *Benefits include freeze protection, high boiling stability, and corrosion control for all engine types*

Brake Fluids DOT 3 & DOT 4

Internationally compliant brake fluids suitable for modern automotive braking systems.

Key advantages:

- *High dry & wet boiling points*
- *Reliable performance under extreme temperatures*
- *Moisture control for extended service life Ideal for passenger vehicles, heavy-duty trucks, buses, and industrial equipment.*

MP, EP (Calcium, Lithium) & High-Temperature Greases

A diverse grease portfolio that caters to automotive, industrial, construction, and marine applications.

Ranges include:

- *Multi-Purpose (MP) greases*
- *Extreme Pressure (EP) greases*
- *Lithium & calcium-based formulations*
- *High-temperature greases for demanding conditions Providing excellent mechanical stability, load resistance, and water resistance.*

DM Water, Flushing Oils & Specialty Fluids

Specialized support products for maintenance and industrial processes:

- *DM Water: Pure, demineralized water for batteries, coolants, and industrial use*
- *Flushing Oils: Designed to remove sludge, varnish & contamination during service*
- *Specialty Fluids: Tailor-made solutions for niche industrial, automotive, and mechanical applications.*

Manpower:

Skilled Workforce of 45+ Employees

A fully trained and diverse team equipped with the expertise required to operate and support a high-capacity lubricant, grease, coolant, and brake fluid manufacturing facility.

Our people ensure efficiency, safety, and consistency across all operations.

Technical Machine Operators & Production Staff

Experienced operators manage automated and semi-automatic filling, capping, blending, and packaging lines.

They specialize in:

- *Running complex machinery*
- *Preventive maintenance*
- *Process optimization*
- *Following strict SOPs to ensure ISO-compliant production*

Experienced Chemists & QC/QA Quality Team

A dedicated laboratory team overseeing product quality from raw materials to final packaging.

Their expertise includes:

- *Lubricant, grease, coolant & brake fluid testing*
- *ASTM & ISO compliance*
- *Batch analysis, stability testing & documentation*
- *Research & development for improved formulations*

Logistics, Warehouse & Administrative Professionals

A strong support system ensuring smooth supply-chain operations.

This includes:

- *Warehouse handlers & inventory managers*
- *Dispatch & transport coordinators*
- *Procurement, finance, HR & customer service teams*
- *Supply chain planning & documentation*

Team of Engineers (Mechanical & Electrical Engineers)

Highly qualified engineers responsible for maintaining and improving plant performance.

Their key roles:

- *Overseeing installation, commissioning & maintenance of equipment*
- *Ensuring uninterrupted operations of filling lines, pumps, mixers & heating systems*
- *Process engineering and continuous improvement initiatives*
- *Safety inspections & compliance with industrial standards*
- *Energy optimization and machinery efficiency monitoring*

Production Capacity:

Lubricants: 700 MT Per Month

A high-capacity blending and filling facility capable of producing a diverse range of automotive and industrial lubricants.

Highlights include:

- *Multigrade engine oils, gear oils, hydraulic oils, ATF, and specialty lubricants*
- *Automated filling lines for various SKUs (1L, 4L, 5L, 208L drums)*
- *Consistent batch quality with ISO-controlled processes*
- *Ability to support large-scale domestic and export requirements*

Grease Manufacturing: 180+ MT per month

A dedicated grease plant operating with high-temperature kettles and finishing mills.

Capabilities include:

- *MP, EP, lithium, calcium, and specialty greases*
- *Strict viscosity, penetration, and stability control*
- *Bulk production for automotive and industrial SKUs (0.5KG, 1KG, 8KG, 15KG, 180KG drums)*

This ensures continuous supply and high reliability across all markets.

Coolant: 200,000+ Liters per month

A modern coolant production line engineered for both premix and concentrate formulations.

Features:

- *Automated mixing and dosing systems*
- *Corrosion inhibitor technology (IAT / OAT systems)*
- *Automated filling lines for various SKUs (1L, 4L, 5L, 20L, 200L drums)*
Designed for high throughput to support distributors and private label clients.

Brake Fluid: 100,000+ Liters per month

A specialized high-purity brake fluid production line for DOT 3 and DOT 4 grades.

Strengths include:

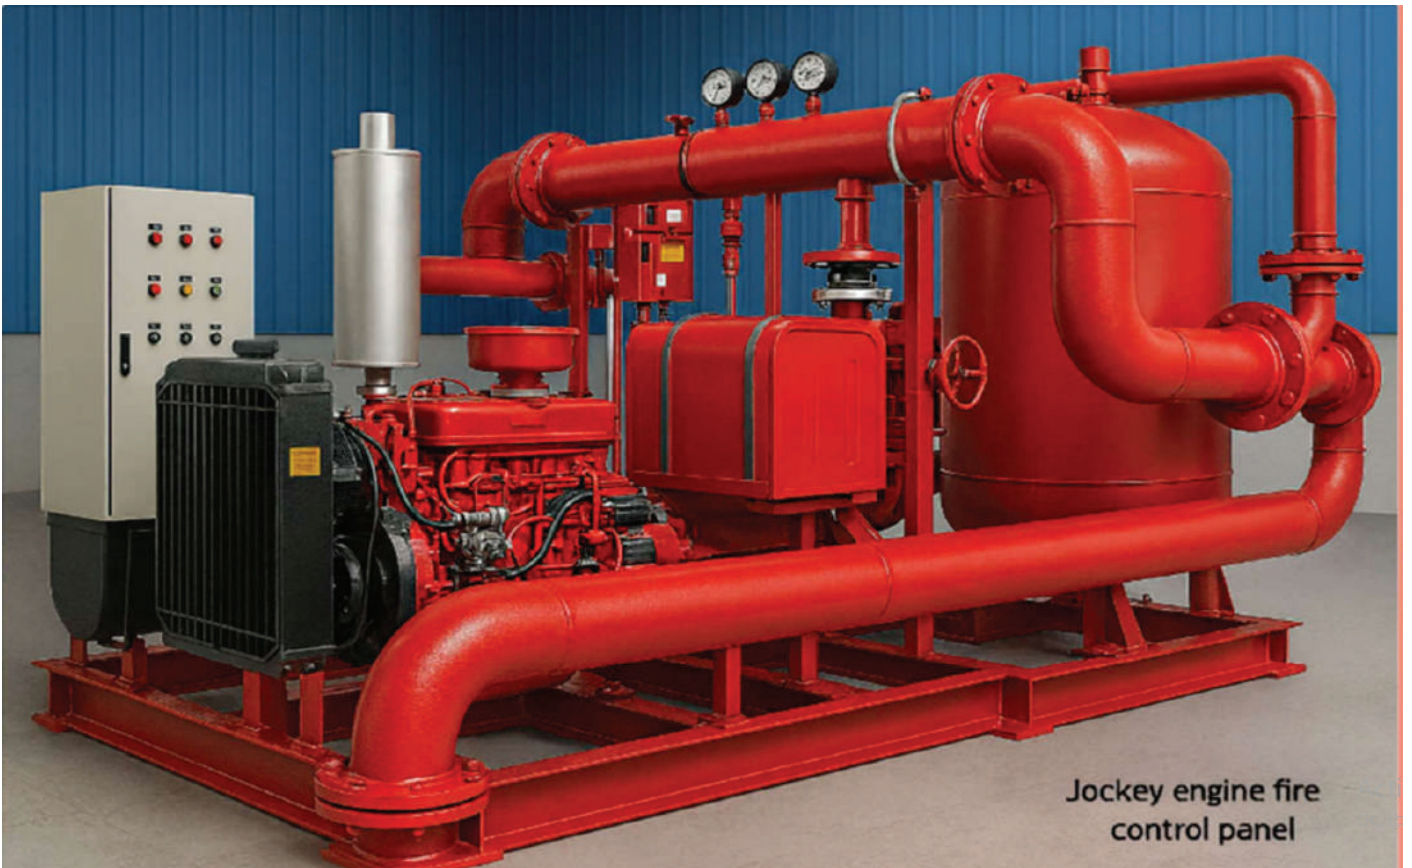

- *Moisture-controlled environment*
- *Nitrogen Purging for Moisture Removal*
- *Precision dosing and sealed filling systems*
- *High dry and wet boiling point stability Ensures reliable performance for passenger cars, heavy vehicles, and industrial equipment.*

Air Scrubbers Installed for Environmental Compliance

Fire-Safety Dedicated fire pump

Jockey engine fire control panel

Our Laboratory

شركة سواحل ذهبي للمنتجات البترولية

SAWAEL DHAHABI PETROLEUM
PRODUCTS COMPANY

Our Laboratory

We strive for our laboratories to be the most advanced in the Kingdom of Saudi Arabia, by supporting them with the latest international examination equipment, in addition to choosing a work team with the highest levels of experience. We are committed to providing the best quality standards.

Production:

*Raw materials: **Sawael Dhahabi Petroleum Products Company** uses superior quality virgin base oil supplied by Saudi Aramco base oil company (Lubref), blended with high-performance additives and superior quality materials.*

Our main product classifications are:

- *Automotive lubricants (motor oil – pcmo)*
- *Automotive lubricants (diesel – hd)*
- *Automotive gear & transmission fluid*
- *Industrial lubricants*
- *Greases*
- *Speciality product*

Based on the above category we produce more than 70 products.

Our Brands & Products

شركة سواحل ذهبي للمنتجات البترولية

QMAX is an economical lubricant brand designed to provide reliable lubrication performance at an accessible price point. It offers the perfect balance of quality, reliability, and affordability. QMAX is the smart choice for cost-conscious drivers who demand quality without compromise – consistent protection, reliable performance, and excellent value in every drop.

Superior Performance & Fuel Efficiency:

QMAX fuels are specially formulated to support smooth acceleration, improved mileage, and consistent power delivery. By optimizing the combustion process, QMAX enables engines to perform more efficiently, helping drivers achieve better fuel economy without compromising power or responsiveness.

Advanced Engine Protection:

Built with advanced fuel technology, QMAX helps maintain a cleaner engine by reducing carbon deposits and improving internal cleanliness. This contributes to reduced engine wear, smoother operation, and enhanced durability, supporting longer engine life and stable performance over time.

Reliability You Can Trust:

QMAX is designed for consistent results across varying driving conditions. Its balanced formulation ensures dependable ignition, stable performance, and reliable operation, making it an ideal choice for drivers who demand confidence, efficiency, and protection from their fuel.

Gasomin is a premium high-performance lubricant brand engineered to deliver advanced protection and optimized performance for a wide range of automotive, industrial, and commercial applications. The brand is formulated using high-quality base oils and carefully selected additive technologies to meet international OEM and API standards, ensuring superior wear protection, thermal stability, oxidation resistance, and extended service life for engines, gears, hydraulic and mechanical systems.

Efficiency & Performance

Gasomin fuels are formulated to provide balanced combustion, helping maintain steady acceleration and improved fuel efficiency. Its reliable performance ensures a comfortable and responsive driving experience in daily use.

Engine Care & Consistency

With a focus on clean combustion, Gasomin supports reduced engine deposits and smoother engine operation. This contributes to long-term engine health and dependable performance over time.

Trusted Quality

Gasomin is developed with a commitment to quality and reliability, making it a practical and trusted choice for drivers who value efficiency, consistency, and everyday dependability.

PETROBULL is an internationally compliant premium lubricant brand was created to bridge the gap between global performance expectations and regional market needs. With formulations that address the unique challenges of hot climates, heavy loads, and varied fuel conditions, PETROBULL is the premium lubricant choice in Asia, Africa and GCC, who demand reliability without compromise.

Power & Performance

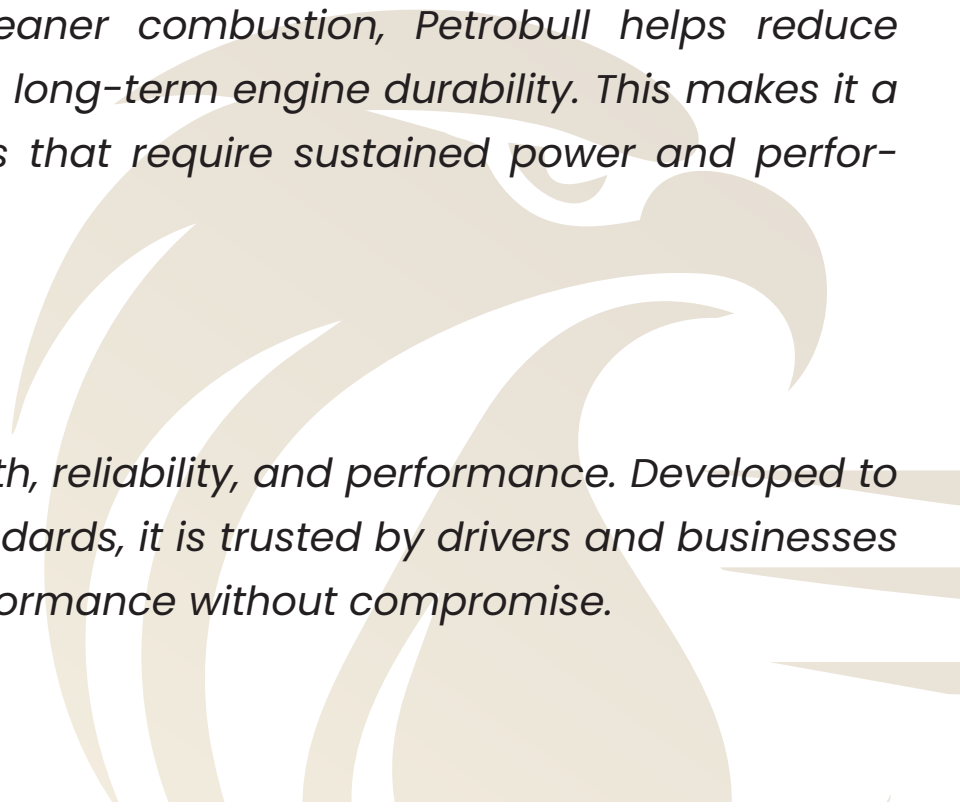

Petrobull fuels are formulated to provide strong acceleration, consistent power, and efficient energy release. Its performance-focused composition ensures reliable engine response, even under demanding driving conditions.

Engine Strength & Protection

Engineered to support cleaner combustion, Petrobull helps reduce engine stress and supports long-term engine durability. This makes it a reliable choice for vehicles that require sustained power and performance.

Built for Reliability

Petrobull represents strength, reliability, and performance. Developed to meet high operational standards, it is trusted by drivers and businesses that demand powerful performance without compromise.
